[Usb To Rs485 Converter Nz Download For Windows 7 Ultimate Edition 32bit](#)

The USB485 is intended for office environments only and not when you have a computer located in a control panel.. The USB485 was ideal for use with a computer that does not have an RS232 serial port as it eliminates the need for a separate USB to serial adaptor.

An isolated comms converter (2400-IS) should be used in such situations The Intech Micro USB485 has the same wiring number system as used in the Intech Micro I/O Remote Stations making the wiring of an Intech Micro system easy:.

Only use the USB485 for temporary monitoring situations; for industrial environments we recommend using a physical RS232 connection..
